Mark French is a fourth generation Montanan. He farms/ranches in western Montana and works as a Clinical Laboratory Scientist. He can not stand by and watch our heritage disappear without working as hard as possible to stop the degradation and return our nation to vibrance. The trend of deficit spending, over-reaching federal government

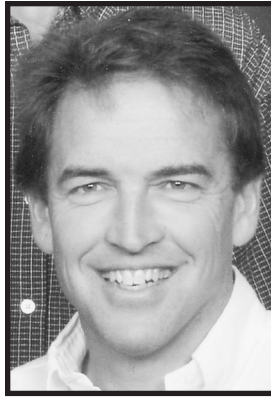

and the continued erosion of our unalienable rights must change. The potential is great! The task is large! The power of a moral people embracing the Constitution is the way to a bright future. Mark is running as a Constitutional Republican.

Mark French also believes:

- The Federal Government must phase out involvement in health-care funding.
- The Patriot Act should be replaced with letters of Marque and Reprisal (warrant/bounty).
- Congress must relieve the Federal Reserve of their role in monetary policy.
- The states and people reserve all powers not granted to the Federal government.
- Private property should be protected from eminent domain abuses.
- Wolf management must be under State Control.
- The right of the people to keep and bear arms shall not be infringed.
- The Creator blesses those who respect innocent life.
- We must secure our borders and end benefits to illegal aliens.
- America should withdraw from the United Nations.
- Elected officials MUST obey their "Oath of Office."
